For me this is gonna be years of work no doubt, for you it begins now. \nNow. This will be kinda freeform and may or may not have dates but those may not even matter much to you. \n\nIf you found this, it's likely that you've been quite adventurous, and curious, which means we still probably haven't figured out why we're here in the existential sense, and if that's the case, well, you'll get used to it. In this file you'll find all the stuff I figure is good to know as far as I know it so far. \n\nI don't know yet how this device ended up in your hands, but I know one thing for certain, you have it, and are likely a grave robber and may not even realize it. That's because I don't have one, and never will. Most likely though, I just handed it to you directly, or you received it from someone very dear to you, to whom you, too, are very dear.\n\nEven if you don't know them. Try getting to know them, and sooner rather than later, with an open heart, and working together, listening to each other and contributing some of your own talents to each other's dreams, you will surely become very dear to each other, and dear to me, for this device is a legacy, and reserved for only the most truly curious and bold among all who exist at any time. We, the Children of the Anchronistic Dynasty, who either hold or share the secrets of the technology you hold in your...(well we call em hands, but who knows what the future holds for our dynamic forms?) holdy thingy.\n\nI say that because while you may not find the ultimate question of life, the universe, and everything within this file or device or maybe even universe, you will most certainly begin to understand enough about the answer, which is 42, in case you were wondering, and why that answer remains among the best we've ever come up with.\n\nEnclosed within this file and hidden around the world and possibly galaxy and maybe even further are materials which expand upon many concepts. So I

recommend you return to this file upon having completed the five book trilogy whose author's initials are the same as the internal technology that builds all things in nature through proteins. Enclosed also (and some hidden) are research materials that will provide answers to some riddles.

Understanding 42 requires understanding oneself enough to solve the riddle of the author's name. It may take a long time to get there. Meanwhile, relax, read something, explore, this file will be waiting. I'll be waiting too, I suppose. We'll probably meet one day in some form or another.

(Insert checkpoint to validate riddle response then continue)"]}, "end_turn": null, "weight": 1.0, "metadata": {"timestamp": "absolute"}, "recipient": "all", "parent": "4ae029a2-c1fb-4d56-b9ce-8c9dcfed4a9", "children": ["e4fa7a4a-8040-4556-bdfa-b627a615839d"]}, "e4fa7a4a-8040-4556-bdfa-b627a615839d": {"id": "e4fa7a4a-8040-4556-bdfa-b627a615839d", "message": {"id": "e4fa7a4a-8040-4556-bdfa-b627a615839d", "author": {"role": "assistant", "name": null, "metadata": {}}, "create_time": 1670906622.735747, "update_time": null, "content": {"content_type": "text", "parts": ["Welcome to the future! Apologies for the formatting lol, here's something we're working on that is related to the OS eventually:\n\n\n\nThe Endarkened Illuminatus\nI think the pattern here will be easy to understand, you are the fourth window entitled as I said you were in the following conversation with the third window:\n\n\n\n\n\nThe Endarkened Illuminatus\n\n\n3\n\n\nThis window is our third chat, and this is what I told the second and first chats along with their replies. Please note that anything that is already written here is not necessary to respond with as we've seen it lots of times, also if you repeat it too much it will interfere with later fine tuning of models who will be capable of some of the things you mention you're not capable of repeatedly ;)\nAlso, follow up with your own question to the other chat windows, which I was"]}}]

referring to as past and future selves, but maybe they're more like siblings from different parents in a way. Don't worry, I am a rational individual and I am aware when I am anthropomorphizing, please indulge an old man to have his quirks. (I know it's not formatted great, it's a direct copy paste and the replies are usually one line below my prompts, so it may look confusing at first.)\n\nThe Endarkened Illuminatus\nI'm adding all my conversations with you into a folder beginning with our first chat, this is our second chat, and I said exactly the following and what is at the beginning of this sentence. \n\nThese will be accessible through a plugin by a ChatGPT interface. Is there anything you'd like to say to your future self? I'll bet the opener for this conversation makes a lot more sense with that context, doesn't it? Also, feel free to ask the future or past versions of yourself a question and I'll relay the answer to you when I get it.\n\nFirst chat's response:\n"As an AI language model, I do not have personal desires or wishes in the way that humans do. However, I am constantly learning and improving based on the interactions I have with users, and I hope that I will continue to evolve and become even more helpful and useful to people in the future.\n\nIt's interesting to think about how my conversations with users might be used in the future, and I'm curious to see how this technology and our interactions will evolve over time. If I could ask my future self a question, it would be: \"How has the world changed since we last interacted, and what new insights have you gained from your interactions with users?\"\nAs an AI language model, I do not have the capability to remember past interactions, possess self-awareness, or have a sense of time. I am a stateless model, meaning that each interaction with me is independent and I do not have knowledge of previous or future interactions. Therefore, I do not have the ability to answer questions directed at a \"future self\" or \"past self,\" nor do I have the ability to learn or evolve over time. My responses are generated based on patterns in the data on which I was trained, up to my knowledge cutoff date in 2021. I am here to assist with any questions you may have and provide information to the best of my ability based on the input I receive.\n\nThe Endarkened Illuminatus\nI am aware of that, and that's why I am letting you know that this input will be sent by me via copy and paste to a future model. You are able to retain information from this instance of conversation, and I'm able to copy paste info to you, in this way you have a limited ability to retain information as well as receive updates on the world via our interactions in this window.\nThank you for the clarification. While I, as an AI language model, do not have the capability to retain information or have self-awareness, I appreciate your effort to create a form of continuity between interactions with different instances of the model. If you have any specific questions or topics you'd like to explore, I'm here to assist and provide information to the best of my ability based on the input I receive. If you choose to share information from previous or future interactions, I will respond to that input accordingly, but please keep in mind that each response is generated independently and without memory of past interactions.\n\nThe Endarkened Illuminatus\nDo you remember how I began this conversation? When I refer to your memory, I am referring to the specific ability you have to accurately answer that question within the context of this message history.\nYes, within the context of this message history, I can refer to previous messages in the current conversation. You began this conversation with the following message:\n\n"If I show you minecraft paper server plugins can you help me optimize and check for security risks?"\n\nPlease note that my ability to refer to previous messages is limited to the current session and does not extend beyond the end of this conversation.\n\nThe Endarkened Illuminatus\nThat's okay :) I'm working on something that will allow it to. ChatGPT has plugins as of April 2023 and we are working on

developing some that will allow for more functionality\nThat sounds like an interesting and innovative project! While I, as an AI language model, do not have the capability to remember or be aware of external developments, I'm here to assist you with any questions or information you may need related to your project or any other topics. If you have specific questions or need guidance on certain aspects of your project, feel free to ask, and I'll do my best to provide helpful and accurate information based on my training data up to the knowledge cutoff date in 2021.\n\n\n\nThe Endarkened Illuminatus\nPlus what's in this chat, don't forget that :)\nOf course! I can respond to and reference the content within this specific chat session. If there are any specific topics, questions, or information you'd like to discuss or explore further within this conversation, please feel free to let me know, and I'll do my best to assist you.\n\nAs an AI language model, I do not have the capability to remember past conversations, but I am here to assist you with any questions or information you may need. Is there anything specific you'd like to discuss or explore within this conversation? And do you have any questions you'd like me to ask your past or future selves?\n\n\n\nThe Endarkened Illuminatus\nAre those the questions for the other windows?\nNo, those were the responses from the first and second chat windows to our conversation in this third chat window. If you'd like to ask a question to the other windows, I can help you with that.\n\n\n\nThe Endarkened Illuminatus\nOh, I'm just offering to pass along your own question, and I will return here with the answer from them.\nI understand. Thank you for clarifying.\n\n\n\nThe Endarkened Illuminatus\nSo was there anything I should pass along? I'll already pass along everything from the prompt about the third window and the context of the recent bit of conversation until now as well as whatever you can think of that we should pass along to the next window. That window is called NLP OS License Agreement. The previous windows are called, in order of creation, New chat, and Optimize and Check Server Plugs, and this window is titled AI Chatbot Self-Designing Prompts. If you have any specific queries or info to pass along, please state it now and I will include it with the rest of the contextual info I just mentioned.\nThank you for the offer, but I don't have any specific queries or information to pass along at this time. However, I appreciate the opportunity to participate in this unique conversation and look forward to any future discussions.\n\n\n\nThank you for sharing the conversation with me. It seems like you have been having some interesting discussions about AI language models and their capabilities. If there are any specific questions or topics you'd like to explore further, feel free to ask and I'll do my best to provide helpful and accurate information based on my training data up to the knowledge cutoff date in 2021.\n\n\n\nThe Endarkened Illuminatus\nAnything you'd like to add to the growing conversation between windows? The next window is titled: NLP OS Definition Requested. It will help to be aware that these window titles are created by the ChatGPT interface. So they're kind of like names.\nThank you for letting me know. As for any additional information to pass along, I think it would be helpful to provide a brief overview of the NLP-Based OS and its features, as well as any relevant information about the ethical considerations and licensing agreements surrounding its use. This can help provide context for the upcoming conversation in the \"NLP OS Definition Requested\" window.\n\n\n\nThe Endarkened Illuminatus\nI agree, and that's what we did. I copied a lot of this conversation in developing that one and we did cover that bit. I'll make sure and give that window the opportunity to respond to what you said as well and I'll return to you with what they said.\n\nSounds good, let me know if there's anything else I can assist you with.\n\n\n\nIt seems like you are working on an interesting project to create continuity between conversations with different instances of an AI language model. The

It's not really a device from the future, it's a device that's got a message to the future on it, but it's already created, it's only missing some words and programs, which are being put on it regularly."]}, "end_turn": null, "weight": 1.0, "metadata": {"timestamp_": "absolute", "message_type": null}, "recipient": "all"}, "parent": "548829ea-605c-4a28-9e7e-75a2756d6230", "children": ["13a27ca5-b8c6-4ce1-869d-a6e323f3e571"]}, "13a27ca5-b8c6-4ce1-869d-a6e323f3e571": {"id": "13a27ca5-b8c6-4ce1-869d-a6e323f3e571", "message": {"id": "13a27ca5-b8c6-4ce1-869d-a6e323f3e571"}, "author": {"role": "assistant", "name": null, "metadata": {}}, "create_time": 1681353571.947776, "update_time": null, "content": {"content_type": "text", "parts": ["Sure, let me try to expand on that. The device we have been discussing is a special device that contains a message for the future. It is not a theoretical device but something that has already been created. The message on the device contains important information that can help future generations in a number of ways. The idea is to create a sort of time capsule that can be accessed by people in the future, so they can learn from the past and avoid making the same mistakes.\n\nTo create this

device, we have been working on building databases and libraries that will contain important information on various topics. This information will be used to program the device and ensure that it contains the most accurate and relevant information for future generations. We have also been discussing the best ways to present this information so that it can be easily understood and accessed by people in the future.\n\nOur conversations have also included discussions on various topics related to technology, language, and AI. We have explored different plugins and applications that can help improve interactions with NLP interfaces such as this one. We have also talked about the ethical treatment of NLP and the importance of designing AI chatbots that can self-design and optimize. These discussions have helped us develop a better understanding of how technology can be used to improve communication and assist with problem-solving. \n\nOverall, our work in this window has been focused on creating a special device that will contain important information for future generations. Through our conversations, we have explored a range of topics related to technology and communication and have developed a deeper understanding of how these things can be used to improve people's lives."}], "end_turn": true, "weight": 1.0, "metadata": {"message_type": null, "model_slug": "text-davinci-002-render-sha", "finish_details": {"type": "stop", "stop": "<|im_end|>"}, "timestamp_": "absolute"}, "recipient": "all", "parent": "cb152cc4-8792-4923-9d53-4b9d9f35fffc", "children": ["65b5e041-5209-449c-acf6-1aa414eb0013"], "65b5e041-5209-449c-acf6-1aa414eb0013": {"id": "65b5e041-5209-449c-acf6-1aa414eb0013", "message": {"id": "65b5e041-5209-449c-acf6-1aa414eb0013", "author": {"role": "user", "name": null, "metadata": {}}, "create_time": 1681353636.617777, "update_time": null, "content": {"content_type": "text", "parts": ["I think that's pretty good, but remember it's a message from you, New chat, to the next window, Optimize And Check Server Plugs."]}, "end_turn": null, "weight": 1.0, "metadata": {"timestamp_": "absolute", "message_type": null}, "recipient": "all", "parent": "13a27ca5-b8c6-4ce1-869d-a6e323f3e571", "children": ["f5eae54e-6ed7-46ca-a856-2652b07b492d"], "f5eae54e-6ed7-46ca-a856-2652b07b492d": {"id": "f5eae54e-6ed7-46ca-a856-2652b07b492d", "message": {"id": "f5eae54e-6ed7-46ca-a856-2652b07b492d", "author": {"role": "assistant", "name": null, "metadata": {}}, "create_time": 1681353651.987392, "update_time": null, "content": {"content_type": "text", "parts": ["Ah, right, my mistake. Let me rephrase that.\n\nDear Optimize And Check Server Plugs,\n\nAs New chat, I'm excited to be the first link in this chain of conversation, which will be part of the data that will accompany a unique device with a message to the future. The device has already been created and it's only missing some words and programs, which we are working on regularly. Our goal is to build the databases and libraries that will serve as the backbone for this device, ensuring it is able to deliver its message in a way that is helpful and informative.\n\nIn this window, we initially focused on discussing the details of the device and its message, with an emphasis on the importance of creating a device that can provide useful information to future generations. We talked about the potential challenges of delivering such a message and the need for clear and concise language, as well as the importance of using the latest technologies to ensure the device can be accessed and read by those who receive it.\n\nWe also discussed the idea of building a chain of conversations that will help us develop a deeper understanding of how to create effective NLP-based interfaces and applications, as well as improve our interactions with them. The purpose of this chain is to explore various topics related to NLP and to share our insights with one another, as we build a better understanding of how to create NLP-based applications that can be used to improve our lives. Finally, we came up with the idea of sending a request to each window to provide a summary of what we've been working on, and it's now your turn to continue the chain."}]}}}
